# G&F SYSTEMS

**LINE CONVEYORS**

**POWER TURNS**

**TRANSFERS**

CONVEYING EXCELLENCE WORLDWIDE

**AUTOMATE YOUR PROCESSING LINES WITH G&F SYSTEMS**

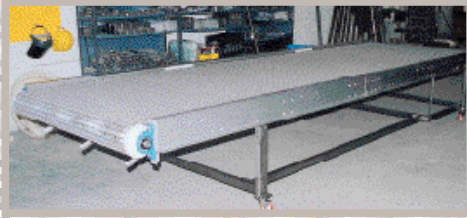

**► LINE CONVEYORS ► POWER TURNS ► TRANSFERS ► INFEEDS ► WASH TANKS**

- Built in Modular Sections
- "Smart Design"
- Flexibility
- Labor Saving
- Adjustable Legs
- Interface with Control Panel
- USDA Approved
- Assembled and Tested in Factory
- Custom or Standard Design
- CAD Design
- Made in the USA
- Quality Construction
- Stainless Steel or Aluminum
- Easy to Clean, Low Maintenance
- Cost Efficient

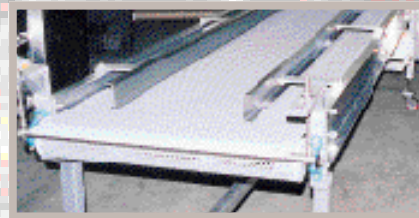

All of G&F's equipment is precision engineered and constructed of the finest materials available to meet your specific requirements. We also manufacture a variety of infeed and discharge conveyors.

G&F's conveyors are modular designed and bolted construction thus allowing you the option to relocate or reconfigure your production line.

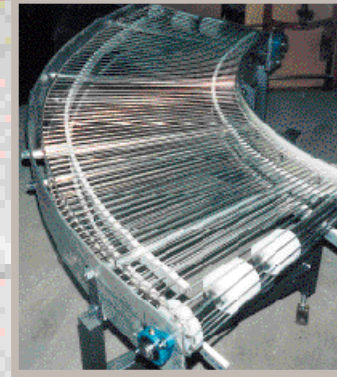

**STYLES AND SIZES**

Variety of Belt Widths

Product Guides

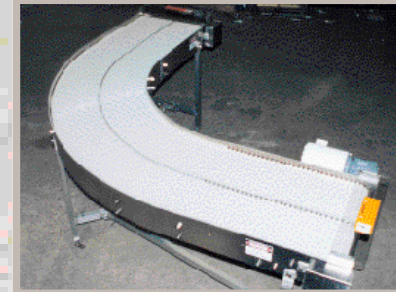

90 Degree Turn

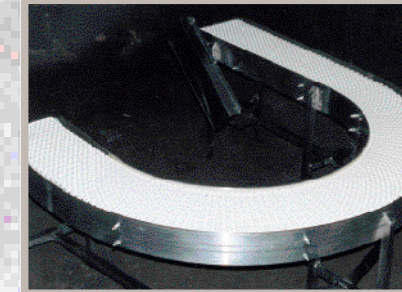

Right Angle Transfer

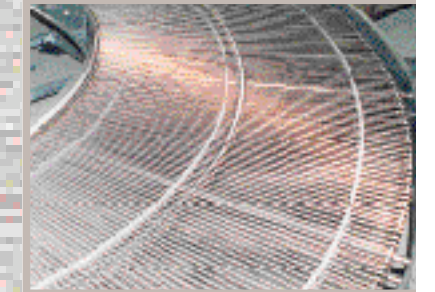

Fixed Radius Turn

90 Degree Power Turn with Plastic Belt

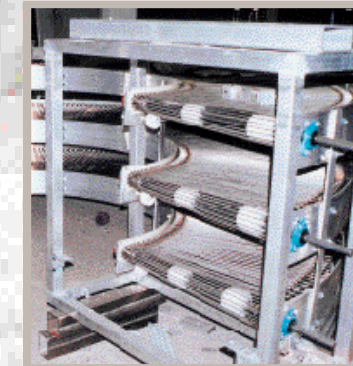

180 Degree Power Turn with Plastic Belt

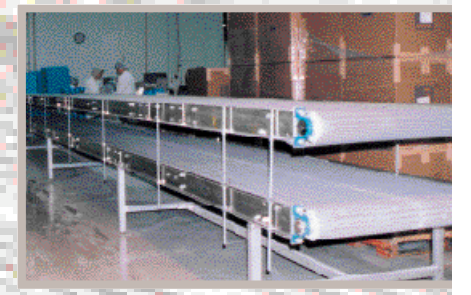

Mesh Turn

Z Conveyor

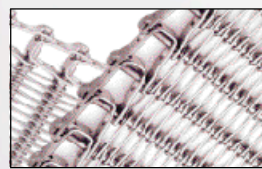

Multi-Tiered

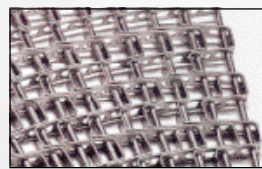

Multi-Tiered Loading

**BELT SELECTIONS:**

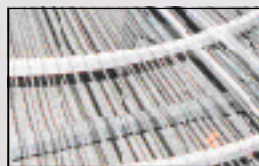

G&F Systems offers a wide selection of Stainless Steel and Plastic Belts.

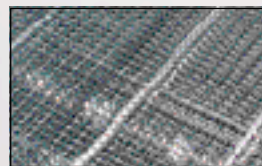

Mesh Overlay Belts for small products

Tight Radius Belts for versatility in limited spaces

Rod Type Belts

Flatwire Belts

Plastic Belts for delicate product

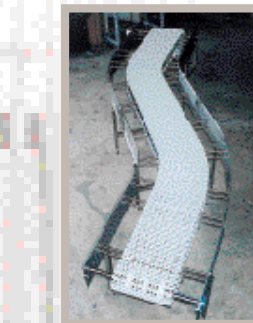

**PARTS AND SERVICE:**

G&F Systems offers worldwide technical support and prompt shipment on parts.

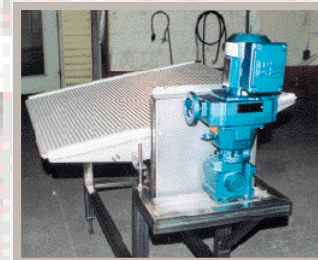

**ELECTRICAL CONTROL PANEL**

G&F's Control Panels interface with your processing and packing lines.

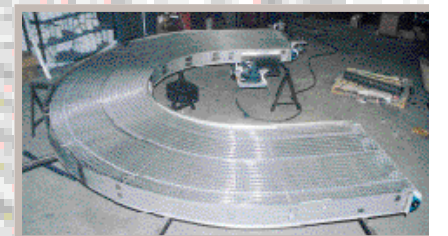

S-Turn

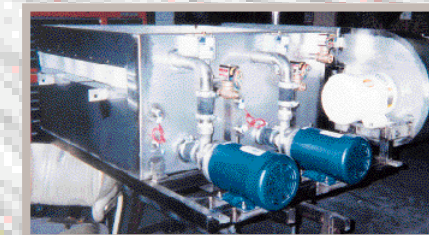

Transfer: Allows for a smooth transition from one conveyor level to another

Tangential Infeed: Allows delicate products to be placed on the collapsed portion of the spiral belt. Also helps to minimize product damage and maintain product uniformity

180 Degree Power Turn with Stainless Steel Belt

Wash Tank: Stainless steel tank with wash chambers pumps water through stainless steel manifolds and nozzles, air dried with plenum and controlled through PLC with necessary water inlet solenoid valve.
