

# G & F SYSTEMS

WORLDWIDE VERTICAL PROCESSING ◻ WORLDWIDE VERTICAL PROCESSING .

Water Chilling ◻ Water Evaporative Cooling ◻ Air Cooling

## APPLICATIONS

Pouches, Bags, Cups, Containers

## THE G & F ADVANTAGE

The G & F system provides a **cost effective** way to **cool/chill** your product without taking up much floor space. The G & F system is designed to use **water** and **evaporative cooling**, **chilled water** or **air** each having its own benefits in processing. Capacities exceeding 50,000 lbs/hr gives you weekly capacities of 150,000 cases per week. All of G & F cooling systems come in modular form making installation fast and easy. Plant water usage is minimized, line efficiencies are increased and product exit temperatures are the lowest on the market.

## CONVEYOR BELT

Choice of Plastic or Stainless

## SYSTEM CONTROLS

All PLC controlled, UL panels, pre-wired, automatic diagnostics, maintenance logs, remote monitoring
